

AIA/CES Program Presented by: American Fiber Cement Corporation

Course Title: High-Density Fiber Cement Cladding Solutions In a Ventilated Rainscreen

Course #: AFC201

Course Credits: LU | HSW

Course Summary: This course discusses various topics pertaining to high-density fiber cement and its use as a cladding material. This includes the manufacturing process, standard ventilated rainscreen system installation practices and benefits, design considerations, and various fiber cement panel applications.

Course Approval Date: 08/24/2018

- American Fiber Cement Corporation is a registered provider with The American Institute of Architects Continuing Education Systems.
- Credit(s) earned on completion of this course will be reported to AIA CES for AIA members. Certificates of Completion for both AIA members and non-AIA members are available upon request.
- This course is registered with AIA CES for continuing professional education. As such, it does not include content that may be deemed or construed to be an approval or endorsement by the AIA of any material of construction or any method or manner of handling, using, distributing, or dealing in any material or product.
