ARCHITECTURAL PRODUCTS

Digitally Printed Architectural Products

Dizal is pleased to offer you our presentation, “Superior Finishes Using HD Printing Technology”. This course will introduce the learner to digital printing’s impact on the cladding industry. We will then review various methods of producing unique finishes on traditional, recyclable cladding materials and compare those options. Finally, we will review how using these types of material can contribute to the overall sustainability of your projects.

Course Objectives:

- Participants will be able to define Sustainability and recognize the three pillars of sustainability: Economic, Environmental, and Social. Participants will be able to relay the benefits of HD Printing as a finish on recyclable materials.
- Participants will be able to distinguish between modern siding options utilizing advanced finishing methods.
- Participants will be able to relay how to optimally design with HD printed material with intention of adding to constructability and simplicity.

Course Number: DZ1000
Provider Number: 404108832
1 CEU / HSW Credit

Credit(s) earned on completion of this course will be reported to AIA CES for AIA members
